NO REPLY DUE

2. COMMUNICATION:

The International Searching Authority (ISA) has determined under Articles 17(2)(a)(ii) that the claims do not comply with the requirements of Article 6 to the extent that, except as indicated below, a meaningful search over the full scope of the claims cannot be carried out. In particular:

Claims 1-11 are not supported by the description. The connection of the tube sheet and header to an insulated substrate by resilient connection means is clearly necessary for the inventive concept described but is not defined in the claims.

Consequently the ISA intends to limit the search in relation to the above mentioned claims to matter which the claims would be reasonably expected to be directed after amendment taking into account the description and drawings and the relevant common general knowledge. Therefore the search will cover:

The apparatus defined in the claims wherein in the tube sheet and header are attached to an insulated substrate by resilient connection means.

The ISA informally invites you to comment on this finding and the proposed limitation of the search within the period indicated above. This is a limited opportunity to correct any misinterpretations or to focus attention on the true nature of the inventive concept if you believe this has been misunderstood. At the end of the period mentioned, the ISA will consider your comments, if any, and proceed to establish the search report and opinion. The ISA will not formally acknowledge or respond to comments but the basis of the search and finding on non-compliance, if appropriate, will be set out in the search report and opinion. Written responses, if made, must be filed electronically to ensure they are received by the authorised officer within the time specified.
